

POLICY 8425

COURSE EQUIVALENCY

POLICY:

Equivalency: The process of granting credit for a provincial or locally developed course if supporting documentation shows that a student has achieved the course learning outcomes at another institution or in another educational jurisdiction.

Equivalency permits students to receive credit toward graduation for relevant learning acquired from other educational jurisdictions and institutions outside the regular school system.

The principles providing a basis for equivalency include:

- (a) Students learn in a variety of ways.
- (b) The diverse needs and abilities of students should be acknowledged.
- (c) Relevant learning acquired by students outside school should be acknowledged and documented.
